Tecnocean Balear in Palma de Mallorca is the only center authorized by Max Power to carry out the R300 maintenance program in Spain.

The inspection will be carried following all the procedures indicated for the R300 Maintenance program by Max Power, using only original spare parts and by technicians trained and authorized by Max Power

Maintenance Program Process

- Initial inspection and complete disassembly of your Retractable Hydraulic Thruster.
- Inspection and report on the condition of all components, with photos of all parts requiring replacement.
- Rebuild of your unit following your approval to proceed
- Replacement of all components.
- Treatment with sandblasting of all cast and re-paint parts
- Delivery of your thruster in as “As-good-as-new” condition, with a warranty period of “one year”.
